

New CommerceStyle Logo!

Work continues on CommerceStyle, I've just finished up the new CommerceStyle logo. It's not the fanciest thing around, but I think its clean and professional.....and more importantly, done. :) Click through to take a look!

There it is. I've worked on it for just under a week now, and I'm proud. I'm no logo designer, and after this work, I'm glad I'm not. This is just a quick screen shot, I've still got to do some touch ups and get it ready for print soon.

The new logo is one of the last things to be completed before a final site go launch. While the site has been live and I've been posting content for a couple of weeks now, I've still yet to launch a few of the key features of CommerceStyle, those will be coming soon.

In the next week you'll see the look of this site be cleaned up as I start working with the graphics and css. I'm looking forward to getting this stuff complete, I think it's going to look great!

One last note, as I mentioned, the site isn't live yet, so there is some key functionality missing....like comments. I've been playing with a few different comment systems but just haven't found anything I like yet. This feature will be in the final version of the site, I just want to make sure to get it right first.

That's all for now.

T
